

Using Avatour in an Igloo

A bit of background

Igloo turns any room into an immersive workspace.

Choose an off-the-shelf structure, like a dome, cylinder or cube, and transform any existing room into an immersive space.

An Igloo immersive space is like stepping inside a giant VR headset to effortlessly engage with colleagues based anywhere in the world.

AVATOUR

Avatour is the remote collaboration platform for on-site meetings.

Using real-time 360° video capture, Avatour creates immersive experiences that enable teams to **meet on-site virtually**.

Avatour uses off-the-shelf hardware to provide real-time, 360° communication, connected via a web browser or optional VR headset.

Step 1:

Capture in Real-Time 360°

Use Avatour to capture the environment live in 360°. Optionally, you can record and upload videos for more flexible collaboration.

The Avatour kit includes everything you need to get started.

Step 2:

Cast to an Igloo

Project the live 360° feed from Avatour to an Igloo to collaborate more effectively with remote teams.

360° Field-of-View

Provides an unobstructed view of the space or location.

Look Around Freely

Give remote guests individual control over their POV to feel physically present.

Asset & Screen Share

With built-in storage - PDFs, videos, images, and more.

Improve Collaboration

Enable remote teams to collaborate on-site.
